

## REPORT

To: <b>BELLSHILL LOCAL AREA PARTNERSHIP</b>	Subject:  <b>ROAD WORKS PROGRAMME 2005/06</b>
From: <b>DIRECTOR OF PLANNING AND ENVIRONMENT</b>	
Date: <b>7 September 2006</b> Ref: <b>N/TM/03/22</b>	

**1. Purpose of Report**

- 1.1 The purpose of this report is to advise the partnership on the works undertaken in the Bellshill Local Area as part of the Roadwork Programme for 2005/06 and to advise of the proposed works for 2006/07.

**2. Background**

- 2.1 Reference is made to the Road Works Programme interim report made to the Planning and Environment Roads and Transportation Sub Committee on the 5 October 2005
- 2.2 Last financial year the Revenue and Capital allocations to Roads, Traffic and Lighting were maintained at a similar level to the previous year. This allocation has enabled the department to carry out a substantial works programme of asset renewal activities during the last financial year.

**3. Programme**

- 3.1 The works programmed to start in the last financial year in the Bellshill Local Area is detailed in the attached appendix A. This programme of work was designed to complement the reactive works activities and extend the useful life of the assets, which comprise the road network. The budget for this programme of works included funds accelerated from the financial year 2006/07.
- 3.2 The budget available for asset renewal in the current financial year is estimated to be £610,476. Programmes of work are currently being compiled, however the works that have been identified to date are detailed in Appendix B.

**4. Performance Indicators**

- 4.1 The Traffic Signal SPI expressed as a percentage of repairs to traffic signals completed in 48 hours was 94%. This figure has remained unchanged from that previously reported on 5 October 2005. The Street Lighting SPI expressed as a percentage of faults repaired in 7 days was 98% this figure placed the Council in the top quartile of the league table of Scottish Local Authorities.
- 4.2 Appendix C indicates that the number of third party claims made against the Council has dropped by a third compared with last year and by two thirds since the introduction of the carriageway and pedestrian precinct safety inspection regime in 2001. The inspection regime was backed up by increased financial resources to repair defects and improve the condition of the road network assets. Footway and footpath safety inspections are also being introduced in a phased manner in order to bring about further improvements to pedestrian safety and reduce the risk of claims.

## **5. Recommendations**

- 5.1 The Partnership is asked to note the achievements of the department in relation to expanding the asset renewal programme and the improved performance of the road maintenance service.
