#### 5. Lanarkshire Business Start-up Trends

5.1 Figures compiled by Scottish Enterprise and the country's four clearing banks have shown that the number of new business start-ups has fallen in Lanarkshire over the last three years:

Year	Quarter 1	Quarter 2	Quarter 3	Quarter 4	Total
1997	442	460	434	428	1,764
1998	440	407	420	365	1,632
1999	407	382	337	279	1,405
2000	-	-	-	-	-

5.2 As can be seen from the figures, the final quarter in 1999 represented the lowest number of business starts in Lanarkshire over the previous 3 years. The figures for the first three quarters of 2000 have not yet been published.

5.3 Compared to 1998, Lanarkshire had 13.9% fewer business starts in 1999. It should be noted that the published figures may be slightly distorted as they are based on the number of new business bank accounts opened by the four main Scottish Clearing Banks: Bank of Scotland, The Royal Bank of

Scotland, Clydesdale Bank and Lloyds TSB Scotland. The figures do not take account of new businesses who hold their bank accounts at other banks or building societies or indeed do not open a business banking account.

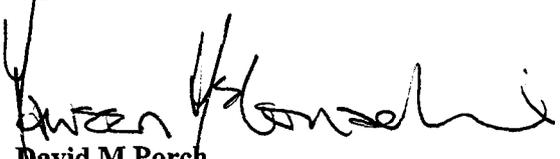

- 5.4 In terms of BOOST for Business Start-up there has also been a slight decline in the number of applications received the first six month period compared to the same six month period in the previous year:

	1 April to 30 September 1999	1 April to 30 September 2000
Applications Received	100	85
Applications Approved	86	61
Applications Rejected/Withdrawn/Pending	14	21

- 5.5 Despite the slight decline in the number of business start-ups, the indications are that the numbers are now starting to pick up again. This is particularly demonstrated in the increase in the number of BOOST for Business start-up applications being received from the Northern and Central areas (see Table 4.2 above) compared to the same period last year.
- 5.6 Scottish Enterprise Lanarkshire have reported a high number of enquiries from individuals wishing to set-up in business which should be further enhanced by the recent launch of the Small Business Gateway. Furthermore, the number of business start-ups which have come through the three local enterprise trusts has increased year on year with 1999/2000 representing the highest number of start-ups within the local enterprise trust network. It should also be noted that there are a relatively high number of technology businesses setting up in Lanarkshire compared to other areas of Scotland.
- 5.7 The Business Start-up in the SIP and Regeneration Area project is aiming to address the low number of business start-ups within the priority areas. The Committee approved the project at its meeting on 27 January 2000. This project should have a positive impact on the number of BOOST applications received from these areas over the coming year, particularly from the Motherwell North and South Coatbridge Social Inclusion Partnership areas.
