Date 25/02/20

Proposal to alter existing non-denominational catchment area within the Ravenscraig area

Proposal for a new build non-denominational primary school within the Ravenscraig area.

From Gerard McLaughlin, Head of Education and Families (North)

Email mclaughling@northlan.gov.uk **Telephone** 01236 812269

Executive Summary

Significant levels of house building are underway within the Ravenscraig site. Approximately 3,000 houses are expected to be built on the 1,200 acre site. The surrounding primary schools in the local catchment area would not be able accommodate the predicted number of children expected in the area due to new Ravenscraig house building.

There is a need to re-define the existing non-denominational catchment areas of Muir Street, Glencairn, Knowetop, Berryhill and Keir Hardie Primary Schools in the Motherwell area and to create a new catchment area within the new Ravenscraig site. The new catchment areas would be defined by rezoning some streets from the existing schools' catchment areas and adding these to the new proposed Ravenscraig catchment area. A break-down of these streets is attached in the consultation paper at Appendix 4.

The house building programme in this area provides an excellent opportunity for North Lanarkshire to bring forward a new school, on a campus that already accommodates exceptional sports facilities (Ravenscraig Sports Facility) and FE learning facilities (New College Lanarkshire). The new school will enhance the offering in this area, through the provision of 21st Century learning and teaching facilities. This, along with the new play park within the wider campus, will provide facilities that not only serve the local residents, but the wider population of North Lanarkshire through integrated active travel connections.

This proposal will help deliver the ambition outlined in the Plan for North Lanarkshire, through the Programme of Works: Town and Community Hub Programme (POW046); and School Modernisation Programme (POW047), and our delivery of new investment for our communities.

Funding for this proposal has been agreed as part of the Schools and Centres 21 Phase Three programme.

Recommendations

The Education Committee is recommended to:

- (i) Approve the consultation around a proposal to build a new non-denominational primary school with an associated nursery class within the Ravenscraig site.
- (ii) Approve the proposal for a statutory consultation to be undertaken proposing that a new non-denominational catchment area is created within the Ravenscraig site. The new catchment area is implemented upon completion of the new non-denominational primary school.

The Plan for North Lanarkshire

Priority Support all children and young people to realise their full potential

Ambition statement (10) Engage with children, young people, parents, carers, and families to help all children and young people reach their full potential

1. Background

- 1.1 Schools (Consultation) (Scotland) Act 2010, hereafter referred to as 'the act'. The provisions of the above Act places a statutory duty on education authorities to carry out formal consultations on proposal to establish, terminate or otherwise alter the catchment area of a school.
 - 1.2 The provisions of the Act also place a statutory duty on education authorities to carry out formal consultations on any proposal to establish a new school.
 - 1.3 The Act requires education authorities to prepare an educational Benefits Statement; prepare (and publish) a proposal paper in respect of any proposal which falls within the terms of the Act; give notice of the proposal to the relevant consultees (and invite representations) in accordance with the Act; hold (and give notice of the proposal to the relevant consultees (and invite representations) in accordance with the Act; hold (and give notice of) a public meeting; and involve Education Scotland.
 - 1.4 Following the period of consultation, the education authority must review the proposal in accordance with the Act and prepare (and publish) a consultation report in accordance with relevant sections of the Act.
 - 1.5 There are five phases linked to a statutory education consultation. Only phases two to five apply as the consultation does not involve a closure of a rural school:
 - Phase two is the consultation period and production of report
 - Phase three is consideration and comment from Education Scotland;
 - Phase four is NLC reflection on Education Scotland comments and publication of final report.
 - Phase five is the council making a decision regarding recommendation.
-

2. Report

- 2.1 The Council is progressing the schools new build programme and the investment linked to this proposal has been agreed as part of phase three of this programme.
- 2.2 The house building programme in this area provides an excellent opportunity for North Lanarkshire to bring forward a new school, on a campus that already accommodates exceptional sports facilities (Ravenscraig Sports Facility) and FE learning facilities (New College Lanarkshire). The new school will enhance the offering in this area, through the provision of 21st Century learning and teaching facilities. This, along with the new play park within the wider campus, will provide facilities that not only serve the local residents, but the wider population of North Lanarkshire through integrated active travel connections.
- 2.3 This proposal will help deliver the ambition outlined in the Plan for North Lanarkshire, through the Programme of Works: Town and Community Hub Programme (POW046); and School Modernisation Programme (POW047), and our delivery of new investment for our communities.
- 2.4 The need for a new non-denominational school in the Ravenscraig area is directly linked to the current and anticipated house building in the Ravenscraig area. All developers building in this area are contributing, through developer contribution, to the costs associated with this new build primary school.
- 2.5 A statutory consultation is required to determine if this proposal can proceed. The proposal, in the form of a statutory education consultation document, is attached at Appendix 1 and permission is sought from the Education Committee to carry out this consultation.

3. Equality and Diversity

3.1 Fairer Scotland Duty

- 3.1.1 The intention underpinning The Fairer Scotland Duty is to reduce the inequalities of outcomes caused by socio-economic disadvantages.
- 3.1.2 The guidance asserts that socio-economic disadvantages can be experienced by (a) Communities of place – people who are bound together because of where they reside, work or visit, and (b) communities of interest – groups of people who share an identity, experience, or one or more of the protected characteristics listed in the Equality Act 2010.
- 3.1.3 The Fairer Scotland Duty is intended to reduce the inequalities of outcomes caused by socio-economic disadvantages. Inequalities of outcomes means any measureable differences between those who have experienced social-economic disadvantage and the rest of the population.
- 3.1.4 The statutory focus on the Fairer Scotland Duty is on strategic decision making and as such the outcomes outlined in this report are to be considered as part of the assessment process for the Plan for North Lanarkshire.
- 3.1.5 Proposal to create a new non-denominational catchment area and to build a new non-denominational primary school in the area will ensure the council has adequate levels of learning and teaching spaces for pupils within this area.

3.2 Equality Impact Assessment

The main beneficiaries of the new school will be the young people of primary school age who will attend the new facility.

4. Implications

4.1 Financial Impact

Long term financial modelling within the Council's capital programme, initially S&C21 and transitioning into the CIF programme, has assumed a new school will be located within the Ravenscraig site. This modelling both in terms of potential costs and funding will continue to be updated through the project planning and implementation process.

Similarly in terms of ongoing revenue costs and funding the Council will build projections and assumptions into the long term budget process, and this position will be subject to ongoing review and amendment.

4.2 HR/Policy/Legislative Impact

The proposal should not have significant implications for teaching or ancillary staff. Any matter which arises will be dealt with within the terms of local and national agreements.

4.3 Environmental Impact

A positive environmental impact should result from this project once completed since the building will be constructed in line with modern energy efficient practices and will therefore have a smaller carbon footprint than the existing school.

4.4 Risk Impact

The council will be in a better position to deliver effective and successful learning and teaching in a 21st century education establishment. Risk associated with the design and build of the new school if approved to proceed following consultation, would be managed through the project risk management plan.

5. Measures of success

5.1 Consultation process which discharges the Council's statutory requirement under the terms of the Schools (Consultation) (Scotland) Act 2010.

5.2 Consultation process which ensures effective engagement with statutory consultees, other stakeholders and all interested parties.

5.3 Consultation report which accurately captures the views of all interested parties who engage in the consultative process.

6 Supporting Documents

- 6.1 Appendix A – Statutory Education Consultation documentation including associated appendices.

A handwritten signature in black ink, appearing to read "Gerard McLaughlin". The signature is written in a cursive style with a prominent flourish at the end.

NORTH LANARKSHIRE COUNCIL: EDUCATION AND FAMILIES

Proposal to alter non-denominational catchment area within the Ravenscraig area

Proposal for a new build non-denominational primary school within the Ravenscraig area

1 INTRODUCTION

- 1.1 Ravenscraig is one of Europe's largest regeneration sites, with a proposed 3000 houses. A new non-denominational catchment area and a new build non-denominational primary school is required for this area due to the size of the new Ravenscraig site and the number of children expected to be resident in the new housing.
- 1.2 There is a need to re-define the existing Muir Street, Glencairn, Knowetop, Berryhill and Keir Hardie Primary Schools non-denominational catchment areas and create a new catchment area within the new Ravenscraig site.
- 1.3 There is a need to build a new non-denominational primary school centred on the Ravenscraig site to support the new proposed housing. The location for the proposed new build primary school are outlined in Appendix 1 of this report with the list of the proposed streets to be moved from the existing non-denominational catchment areas to the new catchment area in Appendix 4.
- 1.4 Education and families propose to have a nursery establishment within the new build primary school.
- 1.5 The house building programme in this area provides an excellent opportunity for North Lanarkshire to bring forward a new school, on a campus that already accommodates exceptional sports facilities (Ravenscraig Sports Facility) and FE learning facilities (New College Lanarkshire). The new school will enhance the offering in this area, through the provision of 21st Century learning and teaching facilities. This, along with the new play park within the wider campus, will provide facilities that not only serve the local residents, but the wider population of North Lanarkshire through integrated active travel connections.
- 1.6 This proposal will help deliver the ambition outlined in the Plan for North Lanarkshire, through the Programme of Works: Town and Community Hub Programme (POW046); and School Modernisation Programme (POW047), and our delivery of new investment for our communities.

2 CONSULTATION REQUIREMENTS

- 2.1 In terms of the Schools (Consultation) (Scotland) Act 2010, the Education Authority is required to publish details of, and consult on any proposal to establish a new school and on any proposal to establish, terminate or otherwise alter the catchment area of a school.

- 2.2 North Lanarkshire Council will not make any decision, or put any changes into effect, until the consultation period has been concluded in line with statutory requirements.
- 2.3 The consultation period will be a total of 56 days, which include 30 school days. It begins on 2 March 2020 and finishes on 26 April 2020.
- 2.4 The consultation will involve pupils, parent/carers, Parent Councils and staff of the schools involved, as well as other associated stakeholder and statutory consultees.
- 2.5 A public meeting will be held at Muir Street Primary on 30th March 2020 at 7pm and at Keir Hardie Primary School on 31st March at 7pm
- 2.6 Council officers will be present at the public meeting to discuss the proposal. There will be limited time at the meeting to discuss all issues fully. To ensure that all issues are covered and that those who may be uncomfortable with speaking publicly are heard, advance notice of specific questions or issues to be raised will be accepted in writing up to two days in advance of the meeting – see contact details at 2.9.
- 2.7 At the end of the consultation process, a report will be prepared for North Lanarkshire Council detailing all responses received, summaries of their content and a statement from Education Scotland on the educational aspects of the proposal. Responses to the issues raised through the consultation will also be incorporated in the report. Copies of the report will be available, prior to consideration by the council, in both schools, local libraries and online. It is envisaged that the report will be published on 29th June 2020. The key dates are set out in Appendix 3.
- 2.8 An online version of the document and other items related to the consultation can be found online
<http://www.northlanarkshire.gov.uk/ravenscraigcatchmentnondenominational@northlan.gov.uk>
- 2.9 Further information on the proposal can be obtained by writing to School Consultations – Education & Families, Windmillhill Street, Motherwell, ML1 1AB; Tel: 01236 812596.
- 2.10 All interested parties are invited to submit their comments on or before 26 April 2020. There are a number of important reasons for this proposal:

3 Proposal

- 3.1 The proposal is to alter the existing non-denominational catchment area on the Ravenscraig site to support the current local plan allocations. This is to be achieved by re-drawing the existing non-denominational catchment areas. This process involves selecting existing streets within the catchment areas of Muir Street and Keir Hardie Primary School and forming a new Ravenscraig catchment area. The further proposal is to build a new non-denominational primary school within the Ravenscraig site to accommodate the new housing proposed within the new development.

The reasons for this proposal are:

- (1) To ensure that pupils within the new housing proposed in the Ravenscraig development can access non-denominational school provision in the Motherwell area.
- (2) To promote community integration between the residents of the new development and the existing Motherwell area.
- (3) The capital investment will provide local opportunities for economic investment will provide local opportunities for economic investment.
- (4) To improve health, wellbeing and air quality through a reduction in school transport.

4 EDUCATION BENEFITS STATEMENT

- 4.1 The provision of a new school will provide the opportunity to make available to pupils the most modern standard of school facilities and resources to support the delivery of a Curriculum for Excellence. The new facilities will offer appropriate, flexible learning experiences which will contribute to the four contexts for learning:
- Ethos and life of the school
 - Curriculum
 - Interdisciplinary learning
 - Personal achievement
- 4.2 Experience in new school buildings has demonstrated that a new and flexible learning environment inspires staff and pupils and has a positive impact on the general health and wellbeing of stakeholders. Further, it increases learners' aspirations, attainment, achievement and positive destinations at a later stage in their education. This is evident through improving trends in attainment and achievement of our young people. This proposal will allow pupils to have close access to a new play park, and a state of the art sports facility.
- 4.3 A new school will signal to the local community that North Lanarkshire Council values 21st century learning. This new build will represent best value through the effective and efficient use of Council resources.
- 4.4 Spaces for learning will be designated in such a way as to allow a range of teaching styles and approaches, including active learning, interdisciplinary learning and outdoor learning.
- 4.5 The curriculum will provide the opportunity for learners to achieve across all curricular areas and to develop skills, attributes and capabilities through courses aligned with the design principles of Curriculum for Excellence: challenge and enjoyment, breadth, progression, depth, personalisation and choice, coherence and relevance.
- 4.6 Children and young people will be provided with a broad range of opportunities for personal achievement and interdisciplinary learning across all curricular areas by building on best practice in curriculum design in North Lanarkshire Schools.

- 4.7 A new 21st century school building will provide a hub for learning, activities and facilities that will make a contribution to improving people's health and wellbeing, adding to the strength and vibrancy of the community.
- 4.8 The provision of high quality technology for learning will provide the potential to transform ways of learning and teaching by giving young people and staff flexible and embedded access to a fully digital learning environment.
- 4.9 The new school will be designed in such a way as to promote accessible, inclusive learning which will meet the needs of all learners, including those with Additional Support Needs, within a mainstream setting.

The new school will be fully accessible to disabled learners as required by the Equality Act (2010). This will be ensured through the delivery of the Council's:

- Equality outcomes
- Promoting Inclusive Design Protocol
- Partnership with North Lanarkshire Disability Access Panel

The design, construction and operation of this new facility will be environmentally and energy efficient, contributing directly to delivering the year-on-year reductions in greenhouse gas emissions introduced by the Climate Change (Scotland) Act 2009. It will provide a rich context for learning about sustainability now and in the future for successive cohorts of children.

- 4.10 Children will be able to walk to school, therefore there will be minimal impact on existing travel arrangements.

If this proposal does not go ahead, and all pupils are required to remain within the existing catchment areas, there would be significant challenges in accommodating all projected pupils as house building in the area progresses. This would have a direct impact on the learning and teaching experience.

- 4.11 If this proposal goes ahead, there may be children who will not be attending the school that they thought they would. Mitigation of this would come by way of placing request applications.
- 4.12 Safe walking routes will be developed, which will enable children to walk safely to the new school.

5 COMMUNITY IMPACT

- 5.1 In order to maximise the level of local community benefit, regular meetings take place with framework contractors and the Council Schools and Centres 21 Team. As we move forward at the pre-qualification stage, contractors appointed to the framework, and their supply chains, will be required to actively participate in the achievement of social, environmental and sustainable policy objectives related to local regeneration, social and economic growth, including recruitment and training along with local supply chain initiatives. In addition, sustainability will be a key objective on the construction of the new schools, thereby contributing to the Council's target for reducing our carbon footprint.
- 5.2 North Lanarkshire Council has held a community workshop event at the Ravenscraig Regional Sports Facility for local people who had expressed an

interest in forming a group to help look at the future life of the park and shape ongoing development. It has identified a need to work with the Council and its contractors, to develop the opportunities for education and engagement with the schools and colleges within the park and the wider network as it expands. Staff from the Council's Community Partnership Team will provide support to any future group that is established to build capacity at a local level.

- 5.3 The house building programme in this area provides an excellent opportunity for North Lanarkshire to build a new school, on a campus that already accommodates exceptional sports facilities (Ravenscraig Sports Facility) and FE learning facilities (New College Lanarkshire). The new schools will enhance the offering in this area, through the provision of 21st Century learning and teaching facilities. This, along with the new play park within the wider campus, will provide facilities that not only serve the local residents, but the wider population of North Lanarkshire through integrated active travel connections.

6 IMPLICATIONS OF THE PROPOSAL

6.1.1 New catchment area

The main influence for the requirement for a new catchment area in the Ravenscraig area is the projected house building in the area. The projected number of houses on the Ravenscraig development alone is approximately 3000 houses. Therefore a new delineated area for a non-denominational catchment is required to ensure that pupil numbers can be accommodated in the new and current catchment areas.

6.1.2 New school building

A new non-denominational school is required within the local area to accommodate the prospective number of children living in houses being built within the Ravenscraig development.

6.1.3 Financial implications

Based on previous experience of new build projects within North Lanarkshire, it is anticipated that this proposal will have limited impact on school revenue budgets.

7 EQUALITY IMPACT ASSESSMENT

The Equality Impact Assessment, Stage 1 Initial Screening has been carried out using the Council Equality Assessment Toolkit. This indicates that a full impact assessment (Stage 2) is required. Information gathered during the consultation exercise will inform the assessment of impact on protected groups. The Equality Impact Assessment will inform the post consultation stage, should the proposal be adopted.

8 INACCURACIES OR OMISSIONS

- 8.1 There is a statutory requirement for the Council to consider any allegation of an inaccuracy or omission in the proposal paper and determine whether the allegation has foundation. Where inaccuracies or omissions are notified to, or discovered by, the Council within this proposal document, the Council will

determine if relevant information has, in its opinion been omitted or whether there is in fact an inaccuracy.

Notifiers of any omissions or inaccuracies will be informed of the Council's decision and the reasons for that decision. Notifiers will also be informed of any action. The Council will invite the notifiers to make further representations to the Council should they disagree with the Council's determination or its decision as to whether to take action.

- 8.2 If the Council has found, either itself or through a concern being raised, that there is an inaccuracy or omission in the proposal paper, it must decide whether this relates to a material consideration relevant to the proposal.

Where the confirmed inaccuracy or omission relates to a material consideration, there is a duty on the Council to correct it.

- 8.3 Appropriate action will then be taken by the Council depending on whether the inaccuracy or omission relates to a material consideration.

Such action may include withdrawing the proposal and issuing a revised proposal paper for the whole consultation period, or issuing a corrected proposal paper with, if appropriate, an extension of the consultation period. In any of these eventualities, all relevant consultees (and, where applicable, the notifier(s) of any omissions or inaccuracies) and HMIE (Education Scotland) will be advised of the appropriate action.

Where inaccuracies or omissions are discovered within the proposal document, the Council will determine whether relevant information has been omitted or if there has been an inaccuracy. Appropriate action will then be taken by the Council, which may include issuing corrections, issuing a corrected proposal document, or an extension of the consultation period. In any of these eventualities, all relevant consultees (and where applicable, the notifiers(s) of any appropriate action) will be advised.

- 8.4 Notifiers of any omissions or inaccuracies will also be given the opportunity to make representations if they disagree with the Council's determination of any action on the matter, which may result in the Council making a further determination/decision on the matter.

9 THE STATUTORY CONSULTATION PROCESS – ADDITIONAL INFORMATION

- 9.1 The current requirements for consulting are set out in the Schools (Consultation) (Scotland) Act 2010. This consultation will be carried out in accordance with the Act.
- 9.2 This consultation has been planned in order to meet the following statutory requirements:
- 9.2.1 The consultation document sets out the details of the proposal.
- 9.2.2 The proposal paper details the educational benefits of the proposal and other relevant information.
- 9.2.3 The proposal paper will be published and widely advertised.

- 9.2.4 North Lanarkshire Council will seek to determine whether there are inaccuracies or omissions within the proposal paper and take such action as it considers necessary.
- 9.2.5 The consultation period will be a period of at least 6 weeks including at least 30 school days.
- 9.2.6 Prior to the commencement of the consultation period, the authority will give notice of the proposal to the relevant consultees. The relevant consultees are defined in the Schools (Consultation) (Scotland) Act 2010, and are as follows:
- (a) The parent council or combined parent council of any affected school
 - (b) The parents of the pupils at any affected school
 - (c) The parents of any children expected by the education authority to attend the affected school within two years of the date of publication of the proposed paper
 - (d) The pupils at any affected school (in so far as the education authority considers them to be of suitable age and maturity)
 - (e) The staff (teaching and other) at any of the affected school(s)
 - (f) Any trade union which appears to the education authority to be representative of the persons mentioned above
 - (g) The community council (if any)
 - (h) The community planning partnership (within the meaning of section 4(5) of the Community Empowerments (Scotland) Act 2015 for the area of the local authority in which any affected school is situated
 - (i) Any other community planning partnership that the education authority considers relevant
 - (j) Any other education authority that the education authority considers relevant
 - (k) Any other users of any affected school that the education authority considers relevant
- 9.2.7 During the consultation period, the authority will hold and be represented at public meetings on the relevant proposal.
- 9.2.8 The council will involve Education Scotland in the consultation process. This will culminate in Education Scotland preparing and submitting an independent report on the educational aspects of the proposal.
- 9.2.9 Following the consultation period, the council will prepare and publish a consultation report. The report will be published at least three weeks before a final decision is taken on the proposal.
- 9.2.10 The consultation timeline provides further information on the timescales for various staged in the statutory process.
